Application No.: Not Yet Assigned Docket No.: A8319.0015/P015-A

AMENDMENTS TO THE CLAIMS

- 1-6. (Canceled)
- 7. (Original) A battery apparatus, comprising:

plural battery modules connected in series each having plural battery cells connected in series;

plural low order control devices which are provided in correspondence with the plural battery modules, respectively, each of the plural low order control devices controlling the plural battery cells configuring corresponding one of the plural battery modules;

a high order control device which controls the plural low order control devices;

a voltage detecting unit which detects voltages of the plural battery cells within the battery module; and

an error calibration terminal which calibrates an error of the voltage detecting unit.

8. (Original) A battery apparatus according to claim 7, wherein:

the voltage detecting unit is an A/D converter; and

the low order control device compensates an output value of the A/D converter by previously giving a digital value to the error calibration terminal of the A/D converter.

9. (Original) A battery apparatus according to claim 8, wherein:

the A/D converter comprises:

Application No.: Not Yet Assigned Docket No.: A8319.0015/P015-A

an integration unit which integrates a unit amount of electricity according to a number of pulses;

a comparing unit which compares an integral value of the integration unit with a voltage of the battery cell and stops the pulse;

a counter unit which outputs the number of pulses when the pulse is stopped by the comparing unit; and

a compensation unit which compensates an output of the counter unit according to the digital value given to the error calibration terminal.

10. (Original) A battery apparatus according to claim 9, wherein the compensation unit changes a counted value of the counter unit according to the digital value given to the error calibration terminal to compensate an offset of the A/D conversion and changes a width of the pulse to compensate a gain of the A/D conversion.
